Module 7

<u>Update</u>

        I just finished 'upgrading' my design docs, and I don't completely hate them anymore. They're still-- well, I know it won't be exactly how my webpage will turn out, and I'm prepared to make the necessary adjustments.

        I think the *upgrade* really makes the design docs look more professional, and complete. I'm really glad I took the time to play around and make them look better.
